

Submission to the Victorian Law Reform Commission

MEDICINAL CANNABIS REFERENCE

Number	85
Name	Iain Fredin
Date	23 June 2015

Hi i attended the bairnsdale consultation And As i Said on the Day HERB should b treated Liké grapes Any ONE Can grow THEM För Personal consumption Büt As Soon As Ü Want TÓ Sell It TÓ The Public ITS neccessary TÓ b tested För quallity So creating further employment áreas There Is NO DOUTING THE TRUTHFULL FACT THAT MARIHUANA ISNT THE EVIL WÈÉD ITS BEEN PORTRAYED AS EVER SINCE MONEY HUNGRY PRESCRIPTION DRUG COMPANIES HAVE BEEN AROUND BECAUSE THEY CARNT PATENT THE NUMEROUS AMOUNTS OF THE TOTAL PLANT ÀS A FORM OF A MEDICIANALY VIABLE MEDICINE IE THEY CARNT MAKE A MEDICINE THAT COPYRIGHT CAN MAKE PROFITABLE WE R ALL BORN WITH AN ENDOCANNABANOID SYSTEM THAT IS MEANT TÓ B ÜSED BY ÜS INGESTING CANNABIS AND THIS HAS BÈÉN HAPPENING FÖR THOUSANDS OF YEARS RIGHT ÜP TILL SOMEBODY DECIDED THEY NEW BETTER AND THE FACT THEY COULDNT CONTROLL ITS SALE AND MONEY MAKEING POSITION DEEMED IT A POISION / NARCOTIC . MONEY FROM TAX RAISED FROM THE SALE OF RECREATIONAL WÈÉD (MARIHUANA) HAS BÈÉN AN INCREADABLE BOOST TÓ THE ECONEMEE OF THE STATES INSTEAD OF GOING TÓ THE BLACKMARKET Big Pharma Wont Support The ReEmergence of its nemisis archenemy And As a NUMBER of people suspect ARE The Reason Behind Wèéds demize indeed

Why is an Australian trial needed? Numerous trials have been done elsewhere in the world to prove it's efficacy in treating many illnesses, so don't we recognise their expertise? According to the W.H.O. over 200 million people used cannabis last year worldwide without a single death to toxicity so we know it is 'safe' for human consumption. So why even more delay by running a "trial"? These laws have ALWAYS been based on lies and those lies have now all been exposed by the science that has been done around the world. Not one thing that has been claimed about the "dangers" of cannabis has been shown to be true.

Cannabis does not cause cancer, it CURES it.

Cancers are due to damage to CB2 receptors in the body caused by either radiation, toxin or virus attack. Cannabis repairs the receptors so the body can kill the cancer.

Cannabis does not cause mental illness, it TREATS it.

THC is a neuroprotectant and antioxidant, it can cause NO harm to the human body. What THC can do is expose an already existing endocannabinoid

deficiency in the CB1 receptors in the brain. Even without using Cannabis a person with this deficiency will develop one form of mental illness or other due to not being able to naturally down regulate the action of the body's own version of THC, Anandamide, as someone without the deficiency does. CBD down modulates the agonist (THC) and is therefore a treatment for the deficiency to relieve the symptoms but not something to fix the underlying cause (usually diet coupled with DNA). Whole plant cannabis extract from fertilised female plants containing both THC and CBD can rebuild the receptors and repair the DNA issues that cause the deficiency in the first place. Same thing works on cancers which are due to CB2 deficiency.

Cannabis is an herbaceous plant.

It lists in the botanical guides in the same family as Hops, Cannabaceae. Cannabis has had a known medicinal use for nearly 5000 years having been listed in early Chinese writings as one of the major medicinal herbs. In all that time there is not a single recorded incident of fatal cannabis poisoning occurring. The W.H.O. has stated that it is impossible to fatally overdose on Cannabis. This is due to the LD50 (the ratio between a medicinally effective dose and the dose that would kill 50% of the population) of cannabis being greater than 1:20000 which is actually an higher LD50 than that of potable water!

It's safety for human consumption is on par with lettuce!

As Cannabis is non-toxic to the human body it's inclusion under the poisons schedule is arbitrary and perverse. Cannabis MUST be de-scheduled immediately. The reasons for this are simple.

It is not a poison, so it should not list as a poison.

It is not a narcotic, so it should not list as a narcotic.

It is not a drug of dependence, so it should not list as a drug of dependence.

Cannabis should fall under the Agriculture Department for commercial supply of it's fibre and seed and raw ingredients for medical use to suitably equipped industrial facilities. Food safety standards should be imposed through out the processing of all cannabis in order to prevent contamination of the medical and food parts of the plant.

Same rules as grapes. Simple.

You can grow as many grapes as you want, no licence;

You can make as many of those grapes into wine as you want, no licence;

You can consume that wine and share it with your friends, no licence;

But the moment you wish to sell that wine for public consumption you must get a licence and prove it is meets food safety standards.

Same rules should apply to Cannabis. A simple model that works well and with which the community is highly familiar.

Commercial distribution would occur from licensed premises (which would NOT be allowed to distribute alcohol).

If noone can show why this should not be the model for the laws around cannabis then to call for "trials for medical cannabis" is just more of the same crap they have spun about for nearly a century.

If anyone does not support complete and IMMEDIATE REPEAL of prohibition then you are a prohibitionist and deserve nothing but contempt because your opinion is based on lies not reality.

The "principle of legality" dictates that in order for a law to be valid it must not be based on a lie. The parliament is not free to pass a law that says black is white! Yet with the current cannabis laws that is what we have in place. They commit perjury every time they charge some one with "cultivate possess or use a drug of dependence namely cannabis" It is not a drug of dependence, it is not a narcotic, It is not a poison, it is a nontoxic medicinal herb which is in fact safer than water! They list it under the Drugs poisons and controlled substances act and make it harder to get than arsenic. They lie to the court and then find you guilty of their lie. It is not justice or law it is straight up fraud.

Any law based on lies is an abomination and any judge/magistrate that upholds the dictates of the parliament above the human rights of the individual and enforces a law based on lies is a despot and needs to be hung.

Wilful ignorance is NOT plausible denyability!
